To Whom It May Concern

Katolec Corporation  
President  
Eisuke Kato

## Notice – Regular member Admission of JIFFA

January 1, 2017, Katolec Corporation became a regular member of JIFFA (Japan International Freight Forwarders Association Inc.).

In international logistics, international multimodal transport – a rational combination of various transport modes, such as seaborne, railway, airborne and trucking services – has grown dramatically in line with the development of containerization.

In order to further promote the overseas logistics business, by newly adding international multipurpose integrated transport to the logistics service menu, we intend to prepare a system that can respond accurately to customers' overseas procurement and overseas sales needs.
