Notice- Acquired certification of AEO from Kobe Customs

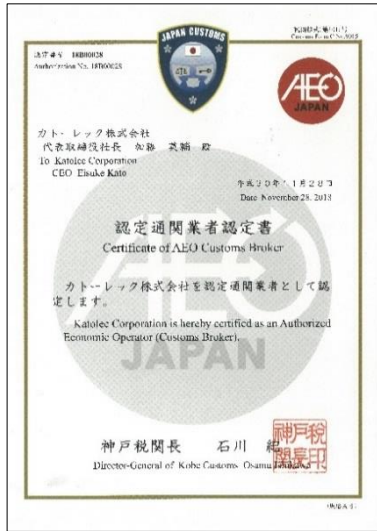

We received the approval of "authorization customs clearance traders" which is one of AEO systems from the Kobe customs chief on December 6, 2018. This can offer high customs clearance service of advantage convenience to a customer in the base where freight of import and export is treated.

To plan for safety ensuring in international trade and compatibility of facilitation through a partnership of a private enterprise and the customs, AEO (Authorized Economic Operator) system is the system that a system of a compliance (decree obeying) is admitted security securement of freight to a maintained enterpriser. Introduction and mutual approval are developed and are recognized widely internationally by all the countries.

The custom clearance admitted by only authorization customs clearance traders becomes possible by the "special case consignment import declaration" it's possible to sort from "specific trust export declaration", the import declaration and the tax filing which can do an export declaration without our bringing freight into a bond storage place by the approval merit of the authorization customs clearance traders. I'll also make further effort towards maintenance of a compliance system from now on and offer safe, certain and quick customs clearance service.

I'll support customer's business strategy with to plan for substantiality of the physical distribution service in which I cooperated with in Japan and our overseas base and expand more global logistics business from now on.
