Katolec Corporation

Notice – Our Sustainability Action

Through our logistics business and electronics (EMS) business, we have been trying to solve social issues and contributed to the realization of a prosperous society.

Recently, social issues on a global scale have become more serious and efforts to address them are becoming increasingly important.

Accordingly, we view the Sustainable Development Goals (SDGs) adopted by the United Nations as an important objective to lead the world and subscribe to this vision.

We further declare that we will proactively work toward the realization of a sustainable society through our business by pursuing economic value for our company while at the same time solving social issues.

In identifying our important issues to solve social issues, we evaluated and analyzed the relationship between the efforts of each division and the SDGs, and prioritized them while being aware of social and environmental issues and stakeholder expectations.

As a result, we have identified the following nine goals as our materiality and will promote our activities going forward.

Katolec SDGs Materiality

E (Environment)

Develop environmentally friendly and sustainable business activities

Reduction of toxic chemical substances
Reduction of waste / Recycling of waste

Reduction of greenhouse gas emissions, including CO2

S (Society)

Contribute to creating a society where all people can live in safety and security

Occupational safety and health
Transport safety management

BCP measures
Cultural heritage conservation

G (Corporate Governance)

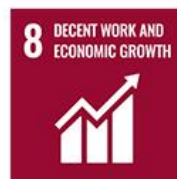

Promote "building a strong organization" so that diverse human resources can work healthily and lively

Non-discrimination
Promotion of diversity

Human resource development and skill enhancement
Improvement of employee motivation

Innovation/Digital Transformation
Information security
